

**I. AMENDMENT**

**A. In th Claims**

Please amend the claim 27 as follows:

---

27. A method for high reliability communication of demographic data from encrypted identities, the method including:

(i.) certifying, by computer, a plurality of respective registrations by substeps including:

receiving a plurality of respective participant registration applications including respective participant identification data and participant demographic data; and

ai for any respective one of said applications accepted for authorization, issuing respective registration data, including encrypted participant identification data and encrypted participant demographic data; and

(ii.) using, by computer, said registration data in substeps of:

respectively receiving said registration data and query-responsive digital signals;

and

associating, by computer, said encrypted participant identification data respectively with said registration data and said query-responsive digital signals in producing an accumulation such that it is not possible to directly associate said participant identification data with either said registration data or said query-responsive digital signals.

---

**II. REMARKS**

The Examiner is requested to reconsider the application in view of the foregoing amendment and the following remarks. It is believed that no new matter has been added.

In paragraph 1 of the Office Action, the Examiner has graciously renumbered the
